1. The applicant is hereby notified that International Preliminary Examining Authority transmits here with the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**
The applicant must enter the national phase before each elected office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details in the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

	Claims		NO
Industrial applicability (IA)	Claims	1 - 9	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

Reference is made to the following document:

D1 : US 5,622,192 A

Claims 1-9 of the present invention relate to a hair-dyeing apparatus comprising a dye container having a case with a nozzle made from hard resin equipped with a thin resin membrane pocket and a conduit, a housing receiving said dye container, a flow path, a comb assembly, and a pump for feeding the dye from the container to the comb assembly through the flow path.

D1 relates to a comb comprising a head portion, a combing portion, a spraying device, a pumping member, a massaging device, and a housing. The combing portion of D1 is provided with a plurality of combing teeth. The spraying device comprises a container for holding therein hair spray and a dispensing apparatus for dispensing hair spray. The massaging device comprises a motor and an eccentric cam. The vibration force of the eccentric cam in motion is transmitted to the combing teeth to provide hair with a massaging effect.

Though the present invention is substantially the same as D1 in having a hair-dye container, a comb assembly, and a driving motor, the driving motor of the present invention is for pressing out hair-dye through a flow path, whereas the motor and cam of D1 is for massaging hair and spraying hair-dye. As a result, the subject matter of the present invention is different from that of D1.

Thus claims 1-9 concerning a hair-dye container and a hair-dyeing apparatus receiving the same are novel and inventive under PCT Article 33(2)-(3).

There is no reason for denying industrial applicability of the present invention.
